Elsevier

Key word Index

A

Activation
diazepam; EEG; patients; performance; phenobarbital; placebo; response related analysis; vigilance; stress, 7

Adenylate cyclase
experimental information neurosis; contractile protein system; calcium transport; adenyl nucleotide; catecholamine; phosphodiesterase, 307

Adenyl nucleotide
experimental informational neurosis; contractile protein system; calcium transport; catecholamine; adenylate cyclase; phosphodiesterase, 307

Age
lapping rate; drinking; hypoglossal nucleus; tongue movement; licking rate; water deprivation; rat, 111

γ-Aminobutyric acid (GABA)
psychophysiology; psychometrics; vigabatrin; GABA transaminase inhibitor; pharmacokinetics; quantitative EEG; lorazepam; encephalotropic effects; psychotropic effects; noopsyche; thymopsyche, 63

Anger
consciousness development; war; peace; history, 157

Anticipatory heart rate deceleration
fixed preparatory interval; variable preparatory interval; children, 175

Attention
psychopathy; skin conductance; orienting; criminality; schizotypy; short-term memory; broken home, 277

Auditory evoked potential
interstimulus interval; interpair interval; first prior interval; second prior interval, 197
rhythm; perception; pause; iamb, 85

B

Baroreceptor
cortical inhibition; pulse transit time; spectral analysis; EEG; electrocardiogram, 183

Biofeedback
instrumental conditioning; non-contingent control; feedback vs feedforward; definitional issue, 293

Biofeedback training
EEG; Tourette's syndrome; tic, 91

Broken home
psychopathy; skin conductance; orienting; criminality; schizotypy; short-term memory; attention, 277

C

Calcium transport
experimental informational neurosis; contractile protein system; adenyl nucleotide; catecholamine; adenylate cyclase; phosphodiesterase, 307

Cardiac cycle effect
primary bradycardia; heart rate, 299

Catecholamine
experimental informational neurosis; contractile protein system; calcium transport; adenyl nucleotide; adenylate cyclase; phosphodiesterase, 307

Cerebral asymmetry
P_{300}; subliminal perception; emotion, 143

Cerebral compound field potential
electroencephalography; event-related brain potential, 269

Children
anticipatory heart rate deceleration; fixed preparatory interval; variable preparatory interval, 175
piracetam; dyslexia; information processing, 41
piracetam; event-related potential; visual evoked potential; dyslexia, 19

Consciousness development
anger; war; peace; history, 157

Contractile protein system
experimental informational neurosis; calcium transport; adenyl nucleotide; catecholamine; adenylate cyclase; phosphodiesterase, 307

Cortical inhibition
baroreceptor; pulse transit time; spectral analysis; EEG; electrocardiogram, 183

Criminality
psychopathy; skin conductance; orienting; schizotypy; short-term memory; attention; broken home, 277

Critical flicker fusion
sulpiride; reaction time; skin conductance; heart rate; pharmacokinetics; healthy volunteers, 1

Cross-correlation analysis pairing
spontaneous DC-shift; median sagittal line; modulation stereotypy; interfrequency cross-correlation; relaxation; moderate mental load, 121

D

DC potential shift
evoked potential; Necker cube, 221

0167-8760/87/$03.50 © 1987 Elsevier Science Publishers B.V. (Biomedical Division)

Definitional issue
biofeedback; instrumental conditioning; non-contingent control; feedback vs feedforward, 293

Diazepam
activation; EEG; patients; performance; phenobarbital; placebo; response related analysis; vigilance; stress, 7

Difficulty level
heart rate; oxygen consumption; respiration; difficulty level, 167

Dreaming
rapid eye movement (REM) sleep; sleep onset; free association; dream source; episodic memory; semantic memory, 209

Dream source
rapid eye movement (REM) sleep; sleep onset; dreaming; free association; episodic memory; semantic memory, 209

Drinking
lapping rate; hypoglossal nucleus; tongue movement; licking rate; age; water deprivation; rat, 111

Dyslexia
nootropics; piracetam; learning disabilities; reading rate; left hemisphere, 29
piracetam; event-related potential; visual evoked potential; children, 19
piracetam; information processing; children, 41
piracetam; RAN-rapid automatized naming; Neimark Memorization Strategies Test; single word reading; prose reading, 53

E

EEG
activation; diazepam; patients; performance; phenobarbital; placebo; response related analysis; vigilance; stress, 7
baroreceptor; cortical inhibition; pulse transit time; spectral analysis; electrocardiogram, 183
biofeedback training; Tourette's syndrome; tic, 91

EEG coherence
movement; EEG power; laterality, 99

EEG power
EEG coherence; movement; laterality, 99

Electrocardiogram
baroreceptor; cortical inhibition; pulse transit time; spectral analysis; EEG, 183

Electroencephalography
cerebral compound field potential; event-related brain potential, 269

Electrodermal activity
orienting; habituation; instruction; signal value; inhibition, 289

Emotion
cerebral asymmetry; P_{300}; subliminal perception, 143
television game; event-related potential (ERP); hemispheric asymmetry; psychotic depression, 149

Encephalotropic effects
psychophysiology; psychometrics; γ-aminobutyric acid (GABA); vigabatrin; GABA transaminase inhibitor; pharmacokinetics; quantitative EEG; lorazepam; psychotropic effects; noopsyche; thymopsyche, 63

Episodic memory
rapid eye movement (REM) sleep; sleep onset; dreaming; free association; dream source; semantic memory, 209

Event-related brain potential
cerebral compound field potential; electroencephalography, 269

Event-related potential
ocular artifact; multiple linear regression, 203
piracetam; visual evoked potential; dyslexia; children, 19
principal factor analysis; Fischer-Roppert procedure, 319
television game; emotion; hemispheric asymmetry; psychotic depression, 149

Evoked potential
DC potential shift; Necker cube, 221

Experimental informational neurosis
contractile protein system; calcium transport; adenyl nucleotide; catecholamine; adenylate cyclase; phosphodiesterase, 307

F

Feedback vs feedforward
biofeedback; instrumental conditioning; non-contingent control; definitional issue, 293

First prior interval
interstimulus interval; interpair interval; second prior interval; auditory evoked potential, 197

Fischer-Roppert procedure
event-related potential; principal factor analysis, 319

Fixed preparatory interval
anticipatory heart rate deceleration; variable preparatory interval; children, 175

Free association
rapid eye movement (REM) sleep; sleep onset; dreaming; dream source; episodic memory; semantic memory, 209

G

GABA transaminase inhibitor
psychophysiology; psychometrics; γ-aminobutyric acid (GABA); vigabatrin; pharmacokinetics; quantitative EEG; lorazepam; encephalotropic effects; psychotropic effects; noopsyche; thymopsyche, 63

H

Habituation
orienting; electrodermal activity; instruction; signal value; inhibition, 289

Handedness
visual evoked potential; hemispheric asymmetry; visual field; temporal frequency, 325

Healthy subject
heart rhythm; heart rhythm power spectrum; wakefulness; slow wave sleep; REM sleep; ischemic heart disease, 129

Healthy volunteers
sulpiride; critical flicker fusion; reaction time; skin conductance; heart rate; pharmacokinetics, 1

Heart rate
oxygen consumption; respiration; mental arithmetic; difficulty level, 167
primary bradycardia; cardiac cycle effect, 299
reactivity; incentive; response cost, 217
sulpiride; critical flicker fusion; reaction time; skin conductance; pharmacokinetics; healthy volunteers, 1

Heart rhythm
heart rhythm power spectrum; wakefulness; slow wave sleep; REM sleep; healthy subject; ischemic heart disease, 129

Heart rhythm power spectrum
heart rhythm; wakefulness; slow wave sleep; REM sleep; healthy subject; ischemic heart disease, 129

Hemispheric asymmetry
television game; event-related potential (ERP); emotion; psychotic depression, 149
visual evoked potential; visual field; temporal frequency; handedness, 325

History
anger; consciousness development; war; peace, 157

Hypoglossal nucleus
lapping rate; drinking; tongue movement; licking rate; age; water deprivation; rat, 111

I

Iamb
rhythm; auditory evoked potential; perception; pause, 85

Incentive
heart rate; reactivity; response cost, 217

Information processing
piracetam; dyslexia; children, 41

Inhibition
orienting; habituation; electrodermal activity; instruction; signal value, 289

Instruction
orienting; habituation; electrodermal activity; signal value; inhibition, 289

Instrumental conditioning
biofeedback; non-contingent control; feedback vs feedforward; definitional issue, 293

Interfrequency cross-correlation
spontaneous DC-shift; median sagittal line; modulation stereotypy; cross-correlation analysis pairing; relaxation; moderate mental load, 121

Interpair interval
interstimulus interval; first prior interval; second prior interval; auditory evoked potential, 197

Interstimulus interval
interpair interval; first prior interval; second prior interval; auditory evoked potential, 197

Ischemic heart disease
heart rhythm; heart rhythm power spectrum; wakefulness; slow wave sleep; REM sleep; healthy subject, 129

L

Lapping rate
drinking; hypoglossal nucleus; tongue movement; licking rate; age; water deprivation; rat, 111

Laterality
EEG coherence; movement; EEG power, 99

Learning disabilities
nootropics; dyslexia; piracetam; reading rate; left hemisphere, 29

Left hemisphere
nootropics; dyslexia; piracetam; learning disabilities; reading rate, 29

Licking rate
lapping rate; drinking; hypoglossal nucleus; tongue movement; age; water deprivation; rat, 111

Lorazepam
psychophysiology; psychometrics; γ-aminobutyric acid (GABA); vigabatrin; GABA transaminase inhibitor; pharmacokinetics; quantitative EEG; encephalotropic effects; psychotropic effects; noopsyche; thymopsyche, 63

M

Median sagittal line
spontaneous DC-shift; modulation stereotypy; interfrequency cross-correlation; cross-correlation analysis pairing; relaxation; moderate mental load, 121

Mental arithmetic
heart rate; oxygen consumption; respiration; difficulty level, 167

Moderate mental load
spontaneous DC-shift; median sagittal line; modulation stereotypy; interfrequency cross-correlation; cross-correlation analysis pairing; relaxation, 121

Modulation stereotypy
spontaneous DC-shift; median sagittal line; interfrequency cross-correlation; cross-correlation analysis pairing; relaxation; moderate mental load, 121

Movement
EEG coherence; EEG power; laterality, 99

Multiple linear regression
event-related potential; ocular artifact, 203

N

Necker cube
DC potential shift; evoked potential, 221

Neimark Memorization Strategies Test
piracetam; dyslexia; RAN-rapid automatized naming; single word reading; prose reading, 53

Non-contingent control
biofeedback; instrumental conditioning; feedback vs feedforward; definitional issue, 293

Noopsyche
psychophysiology; psychometrics; γ-aminobutyric acid (GABA); vigabatrin; GABA transaminase inhibitor; pharmacokinetics; quantitative EEG; lorazepam; encephalotropic effects; thymopsyche, 63

Nootropics
dyslexia; piracetam; learning disabilities; reading rate; left hemisphere, 29

O

Ocular artifact
event-related potential; multiple linear regression, 203

Orienting
habituation; electrodermal activity; instruction; signal value; inhibition, 289
psychopathy; skin conductance; criminality; schizotypy; short-term memory; attention; broken home, 277

Oxygen consumption
heart rate; respiration; mental arithmetic; difficulty level, 167

P

P_{300}
cerebral asymmetry; subliminal perception; emotion, 143

Patients
activation; diazepam; EEG; performance; phenobarbital; placebo; response related analysis; vigilance; stress, 7

Pause
rhythm; auditory evoked potential; perception; iamb, 85

Peace
anger; consciousness development; war; history, 157

Perception
rhythm; auditory evoked potential; iamb, 85

Performance
activation; diazepam; EEG; patients; phenobarbital; placebo; response related analysis; vigilance; stress, 7

Pharmacokinetics
psychophysiology; psychometrics; γ-aminobutyric acid (GABA); vigabatrin; GABA transaminase inhibitor; quantitative EEG; lorazepam; encephalotropic effects; psychotropic effects; noopsyche; thymopsyche, 63
sulpiride; critical flicker fusion; reaction time; skin conductance; heart rate; healthy volunteers, 1

Phenobarbital
activation; diazepam; EEG; patients; performance; placebo; response related analysis; vigilance; stress, 7

Phosphodiesterase
experimental information neurosis; contractile protein system; calcium transport; adenyl nucleotide; catecholamine; adenylate cyclase, 307

Piracetam
dyslexia; information processing; children, 41
dyslexia; RAN-rapid automatized naming; Neimark Memorization Strategies Test; single word reading; prose reading, 53
event-related potential; visual evoked potential; dyslexia; children, 19
nootropics; dyslexia; learning disabilities; reading rate; left hemisphere, 29

Placebo
activation; diazepam; EEG; patients; performance; phenobarbital; response related analysis; vigilance; stress, 7

Primary bradycardia
cardiac cycle effect; heart rate, 299

Principal factor analysis
event-related potential; Fischer-Roppert procedure, 319

Prose reading
piracetam; dyslexia; RAN-rapid automatized naming; Neimark Memorization Strategies Test; single word reading, 53

Psychometrics
psychophysiology; γ-aminobutyric acid (GABA); vigabatrin; GABA transaminase inhibitor; pharmacokinetics; quantitative EEG; lorazepam; encephalotropic effects; psychotropic effects; noopsyche; thymopsyche, 63

Psychopathy
skin conductance; orienting; criminality; schizotypy; short-term memory; attention; broken home, 277

Psychophysiology
psychometrics; γ-aminobutyric acid (GABA); vigabatrin; GABA transaminase inhibitor; pharmacokinetics; quantitative EEG; lorazepam; encephalotropic effects; psychotropic effects; noopsyche; thymopsyche, 63

Psychotic depression
television game; event-related potential (ERP); emotion; hemispheric asymmetry, 149

Psychotropic effects
psychophysiology; psychometrics; γ-aminobutyric acid (GABA); vigabatrin; GABA transaminase inhibitor; pharmacokinetics; quantitative EEG; lorazepam; encephalotropic effects; noopsyche; thymopsyche, 63

Pulse transit time
baroreceptor; cortical inhibition; spectral analysis; EEG; electrocardiogram, 183

Q

Quantitative EEG
psychophysiology; psychometrics; γ-aminobutyric acid (GABA); vigabatrin; GABA transaminase inhibitor; pharmacokinetics; lorazepam; encephalotropic effects; psychotropic effects; noopsyche; thymopsyche, 63

R

RAN-rapid automatized naming
piracetam; dyslexia; Neimark Memorization Strategies Test; single word reading; prose reading, 53

Rapid eye movement (REM) sleep
sleep onset; dreaming; free association; dream source; episodic memory; semantic memory, 209

Rat
lapping rate; drinking; hypoglossal nucleus; tongue movement; licking rate; age; water deprivation, 111

Reaction time
sulpiride; critical flicker fusion; skin conductance; heart rate; pharmacokinetics; healthy volunteers, 1

Reactivity
heart rate; incentive; response cost, 217

Reading rate
nootropics; dyslexia; piracetam; learning disabilities; left hemisphere, 29

Relaxation
spontaneous DC-shift; median sagittal line; modulation stereotypy; interfrequency cross-correlation; cross-correlation analysis pairing; moderate mental load, 121

REM sleep
heart rhythm; heart rhythm power spectrum; wakefulness; slow wave sleep; healthy subject; ischemic heart disease, 129

Respiration
heart rate; oxygen consumption; mental arithmetic; difficulty level, 167

Response cost
heart rate; reactivity; incentive, 217

Response related analysis
activation; diazepam; EEG; patients; performance; phenobarbital; placebo; vigilance; stress, 7

Rhythm
auditory evoked potential; perception; pause; iamb, 85

S

Schizotypy
psychopathy; skin conductance; orienting; criminality; short-term memory; attention; broken home, 277

Second prior interval
interstimulus interval; interpair interval; first prior interval; auditory evoked potential, 197

Semantic memory
rapid eye movement (REM) sleep; sleep onset; dreaming; free association; dream source; episodic memory, 209

Short-term memory
psychopathy; skin conductance; orienting; criminality; schizotypy; attention; broken home, 277

Signal value
orienting; habituation; electrodermal activity; instruction; inhibition, 289

Single word reading
piracetam; dyslexia; RAN-rapid automatized naming; Neimark Memorization Strategies Test; prose reading, 53

Skin conductance
psychopathy; orienting; criminality; shizotypy; short-term memory; attention; broken home, 277
sulpiride; critical flicker fusion; reaction time; heart rate; pharmacokinetics; healthy volunteers, 1

Sleep onset,
rapid eye movement (REM) sleep; dreaming; free association; dream source; episodic memory; semantic memory, 209

Slow wave sleep
heart rhythm; heart rhythm power spectrum; wakefulness; REM sleep; healthy subject; ischemic heart disease, 129

Spectral analysis
baroreceptor; cortical inhibition; pulse transit time; EEG; electrocardiogram, 183

Spontaneous DC-shift
median sagittal line; modulation stereotypy; interfrequency cross-correlation; cross-correlation analysis pairing; relaxation; moderate mental load, 121

Stress
activation; diazepam; EEG; patients; performance; phenobarbital; placebo; response related analysis; vigilance, 7

Subliminal perception
cerebral asymmetry; P_{300}; emotion; 143

Sulpiride
critical flicker fusion; reaction time; skin conductance; heart rate; pharmacokinetics; healthy volunteers, 1

T

Television game
event-related potential (ERP); emotion; hemispheric asymmetry; psychotic depression, 149

Temporal frequency
visual evoked potential; hemispheric asymmetry; visual field; handedness, 325

Thymopsyche
psychophysiology; psychometrics; γ-aminobutyric acid (GABA); vigabatrin; GABA transaminase inhibitor; pharmacokinetics; quantitative EEG; lorazepam; encephalotropic effects; noopsyche, 63

Tic
EEG; biodfeedback training; Tourette's syndrome, 91

Tongue movement
lapping rate; drinking; hypoglossal nucleus; licking rate; age; water deprivation; rat; 111

Tourette's syndrome
EEG; biofeedback training; tic, 91

V

Vigabatrin
psychophysiology; psychometrics; γ-aminobutyric acid (GABA); GABA transaminase inhibitor; pharmacokinetics; quantitative EEG; lorazepam; encephalotropic effects; psychotropic effects; noopsyche; thymopsyche, 63

Vigilance
activation; diazepam; EEG; patients; performance; phenobarbital; placebo; response related analysis; stress, 7

Visual evoked potential
hemispheric asymmetry; visual field; temporal frequency; handedness, 325
piracetam; event-related potential; dyslexia; children, 19

Visual field
visual evoked potential; hemispheric asymmetry; temporal frequency; handedness, 325

W

Wakefulness
heart rhythm; heart rhythm power spectrum; slow wave sleep; REM sleep; healthy subject; ischemic heart disease, 129

War
anger; consciousness development; peace; history, 157

Water deprivation
lapping rate; drinking; hypoglossal nucleus; tongue movement; licking rate; age; rat, 111

(Contents continued from back cover)

Comparison of principal components computed with principal factor analysis on the basis of averaged and single-trial ERPs during the Fischer-Roppert procedure (PSP 00140)
By W.-U. Dormann, S. Mundlos and R. Haschke (G.D.R.) 319

Short Communication
Hemispheric asymmetry of pattern reversal visual evoked potentials in healthy subjects (PSP 00145)
By L. Mecacci and D. Spinelli (Italy) 325

Book Reviews 329

Letter to the Editor
Evoked potentials (PSP 00142)
By H. Stowell, (U.S.A.) 343

Author Index 345

Key Work Index 351
